The smart way to build.

Construction management and monitoring technology to get projects completed on time, on budget, with quality

RISK

How to mitigate the of delay in projects

Delay and budget overrun is not inevitable even with today's fast-track schedules and globally distributed teams. All you need is the right software.

SmartProject offers a painless way to speed up work processes from the ground up, while providing a single collaboration platform for teams and stakeholders.

SmartProject is a secure cloud- based and mobile-friendly solution for construction project management and delivery. It standardises and automates the various stages of the project cycle across engineering, procurement, and construction.

Visit wrenchsp.com to set up a free 30-day trial.

“

Expected a document management tool, got a project management toolbox!"

CH2M

TRANSPARENCY

Benefit from the
of 21st century project management.

Owner/Client: Get the visibility you need to spot problems and control risks that can lead to delays and cost overruns, and make sure the scope that is designed is built and delivered as per the approved plan.

EPC Contractor: Get the information you need to coordinate processes between project managers, consultants, subcontractors and your client. Use the powerful reporting tools to see the status of bids, submittals, RFIs, change orders/variations and many more standard processes.

PMC/Project Manager: Report on progress across complex projects involving multiple independent parties. Provide subcontractors and clients with accurate, up-to-date information, and minimize delays and disputes thanks to a permanent archive and an iron-clad audit trail.

Drawing & document management

Link BIM models, CAD drawings and office documents along with all their versions and revisions during the modification process (Check-in\Check-out). Automatically maintain the relationship with its reference for efficient search-and-retrieval.

Task monitoring (via WBS)

System automatically captures the status of the activities of the task, and updates the progress to the linked task.

Project information capture

All project-related data like weightage factors, quality process, approval status codes, numbering templates, document templates, checklist, vendors and project security accessible at a touch.

Transmittals & submittals

Capture transmittal & submittal templates, automatic generation of transmittal numbers and transmittals with associated document details. Send transmittals and linked documents through email or upload to shared location.

Revision & change management

Raise change requests along with 'reason for change' and 'impact of change'. Route change request through workflows for approvals and document approved changes.

Correspondence Management

Generate project correspondences and information related to the correspondence, maintain the thread of correspondence with history. (Automatic notification of correspondences in case of delay.)

Intelligent and functions to integrate your process

INTUITIVE

Reports and Dashboards

Automatic generation of Dashboards and Reports using the planned, forecast, progress and actual information captured in real time against each activity of a deliverable.

Administration & Utilities

System maintains masters of users, process masters, vendors, clients, sub contractors, deliverable types, document types, checklists, packages etc. Utilities to capture bulk documents and tools for data migration tools included.

Knowledge Management

Capture of process and activity-related knowledge and linked metadata for deliverables with their histories, all of which can be searched and retrieved.

Integration with other software

Integration bridge for SAP, Oracle, MS Dynamics and other ERP's, as well as with Primavera, MS Project, 2D and 3D CAD software, and MS office.

Who's using WRENCH SmartProject?

Jafza Convention Centre, UAE

The \$520 million project includes the construction, completion, and maintenance of a convention centre, food court, office complex and hotel, and features a total built-up area of more than 363,000 square metres. The project comprises two towers with three basement levels and 33 office floors.

St. Regis Beach Resort, Abu Dhabi

Built for the Tourism Development and Investment Company (TDIC), the \$490 million St. Regis Saadiyat Island Resort, Abu Dhabi is the flagship hospitality project on Saadiyat Island. It is comprised of 380 luxury hotel rooms, 259 residential apartments and 33 luxury residential villas. The project also features a retail and entertainment component, a health and racquet club, a health spa and 1,600 structured parking bays.

'Jewel Of The Creek', Dubai

HLG is constructing the US\$130 million Package #7 of the "Jewel of the Creek" development in Port Saeed, Dubai, UAE. Package #7 forms part of the AED 3 billion "Jewel of the Creek" development. When complete it will be a multi-use development which includes four and five star hotels, furnished service apartments, a convention centre, a ballroom, office buildings, residential buildings, a marina and landscaping.
