

An aerial, wide-angle photograph of a city skyline, likely New York City, viewed from the water. The city's buildings and skyscrapers are arranged in a semi-circle, creating a circular horizon line. The water is dark blue with visible ripples. The sky is bright blue with scattered white clouds. The overall composition is circular, emphasizing the 'Plan. Build. Grow.' theme.

Plan. Build. Grow.

Our vision:

To be the trusted digital transformation partner for engineering and construction companies.

Our mission:

To deliver cutting edge technology and global best practices for the engineering and construction companies with world class quality services by our committed and knowledgeable team to provide maximum value to customers.

'Work As One'

In keeping with our belief that the whole is greater than the sum of parts, we help the various members of the EPC industry - owners, contractors, PMCs, consultants, vendors - come together as one team on a single platform, and work together from anywhere in the world.

Transforming e&c through IT.

- ❑ We made the impossible possible by creating the perfect project control system that acts as a business differentiator in growing profits, de-risking and protecting investments, and building trust amongst partners
- ❑ We roll out Intelligent enterprise solutions that change the way construction organizations operate, setting up working environments that are familiar enough to be comfortable yet pioneering enough to immediately widen profit margins
- ❑ We created SmartProject to be a 'live' product, constantly in evolution. It utilizes cutting edge market technology like mobile and cloud platforms to deliver user requirements in an environment where integration with various technologies and platforms would be otherwise impossible.

SmartProject

Our range of mobile-friendly engineering/construction project management solutions and services* is offered under the brand name 'SmartProject' and WRENCH 'SmartProject'

WRENCH does not believe in "One Solution Fits All". Our clients are assured of maximum quality assurance and cost effectiveness through IT that is tailor-made for their vertical

Our experts have created a solution that can work beyond geographical borders and lets companies work more efficiently and cost-effectively than they ever thought possible.

**All WRENCH SmartProject solutions and services are scalable and customized to a customers' budget, his preferred payment model, and his platform of choice (i.e cloud-based or on-premises).*

Strategy

Helping e&c transform digitally.

(The next generation of construction project delivery.)

Integrated approach

We provide our clients with information, quality and collaboration management solutions to improve their business bottom line

Seamless solutions

Our solution provides maximum efficiency and minimum rework, which ensures that projects are managed on time

Automated platform

A fast, safe and easy way to minimize the risk of delays and conflicts

SmartProject Solutions & Services

- Consulting and implementation services that re-engineer the customer's business process
- Industry-specific solutions and services across the EPC cycle
- Cloud-based support, training and implementation

Solutions

- Project data and document management
- Status monitoring & progress of documents
- Multi-office collaboration and correspondence
- Real time monitoring and control
- Compliance and governance (quality management)
- 360° team and resource management
- Project performance SPI & CPI monitoring system.
- Integrated E, P and C management (SaaS)

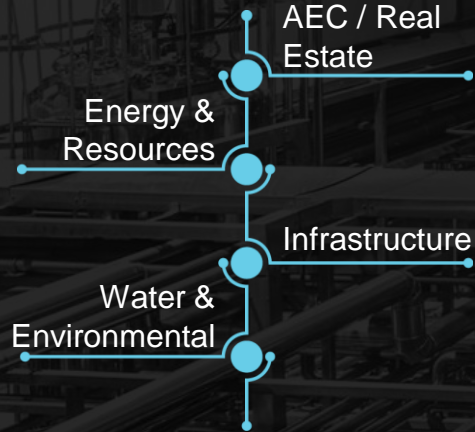

Products

- EPC 2.0
- SMART EDMS
- Project Navigator
- SMART QMS

Services

- Best practices implementation
- Data migration and normalization
- Rollout, Training, Support

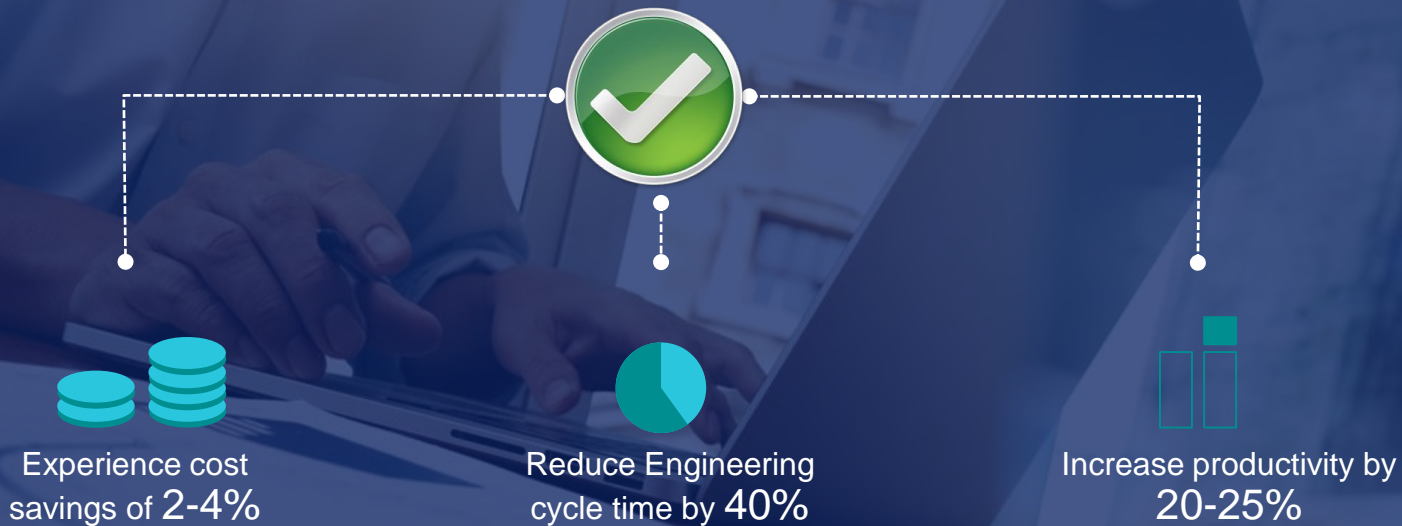

Industries served

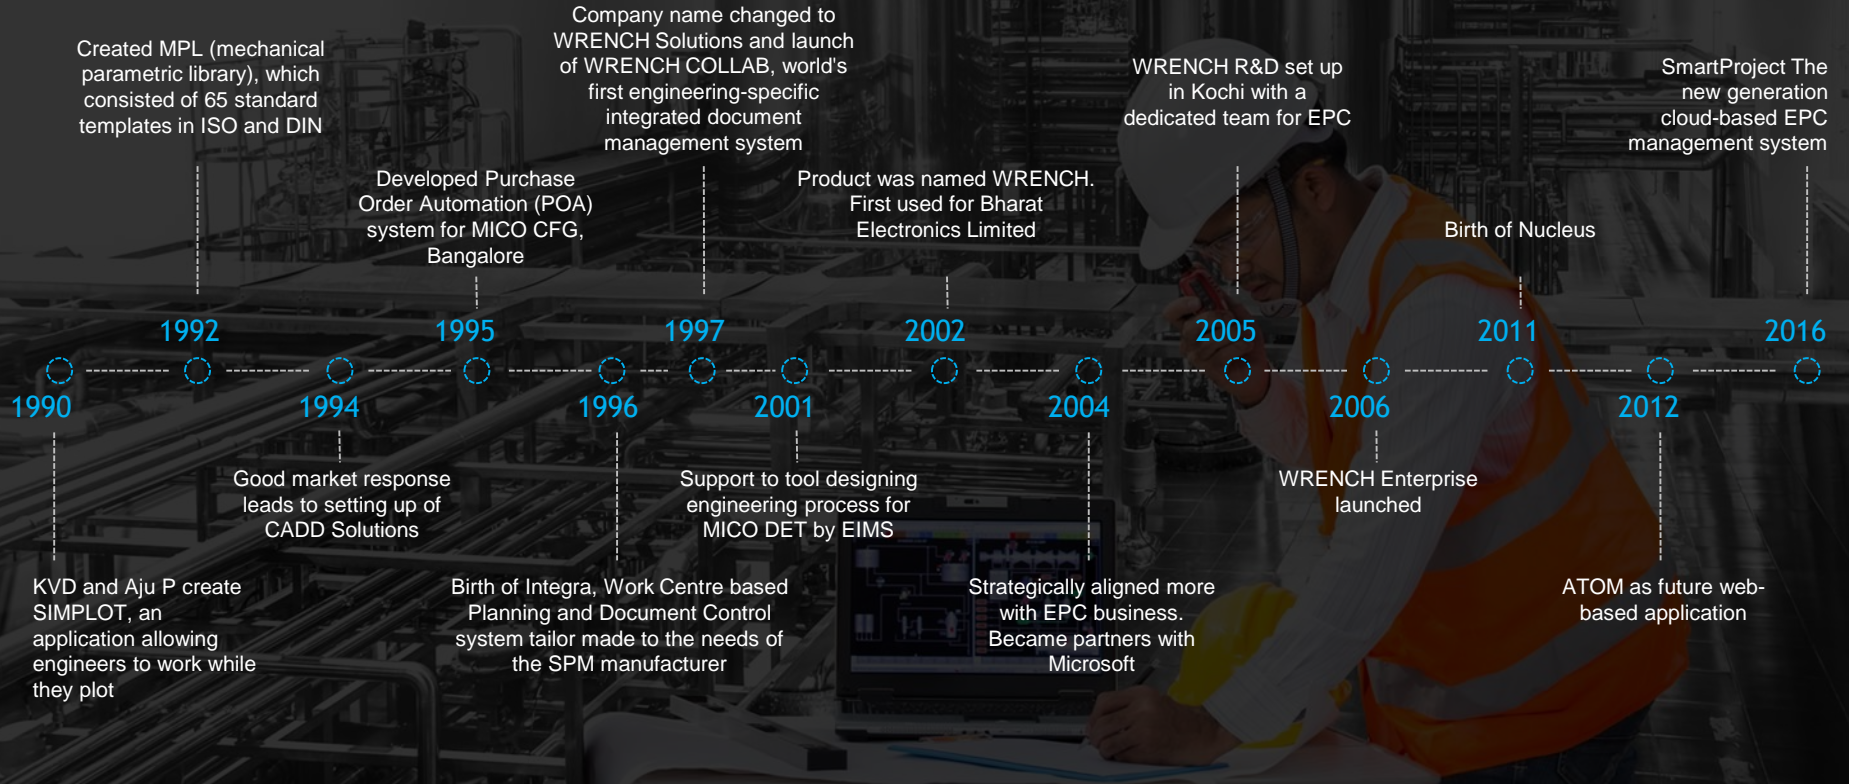

Geographies served

Our clients benefit from our
intuitive and automated solution.

Footprint

Implemented on over
8000 projects
worldwide

- Transformative business solutions and services, not just software.
- Our solution caters to different industry verticals and helps run critical projects on time and within budget.

8,000 projects worldwide; valued at \$400 billion

China petroleum corporation CPECC and long-time WRENCH customer CH2m use SmartProject to reopen long-stalled \$1.6 billion Al Ahdab oil field. CPECC has now switched to SmartProject on its own projects in China and elsewhere

Shortly after entering US market Chiyoda US (a Chiyoda International Corporation, CIC) signed up with WRENCH technology

The USD 300 Million New ADNOC Medical Centre Multi Storey building project will be managed and monitored in WRENCH's latest solution

Murray & Roberts first in South Africa to adopt WRENCH SmartProject technology

Critical infrastructure Solar project opts for SmartProject, brightens prospects for India's solar mission.

The world's largest single metro rail system Doha Metro will be built on SmartProject

Swiss-based water treatment leader VATECH WABAG switch to SmartProject technology, calls it 'A dream come true'

E&C leader Atkins Global switches to WRENCH SmartProject after rigorous testing

Delayed Calgary mining project gets back on track with SmartProject
