

Transform with Technology.

wrenchTM

Corporate Presentation 2022

Worldview

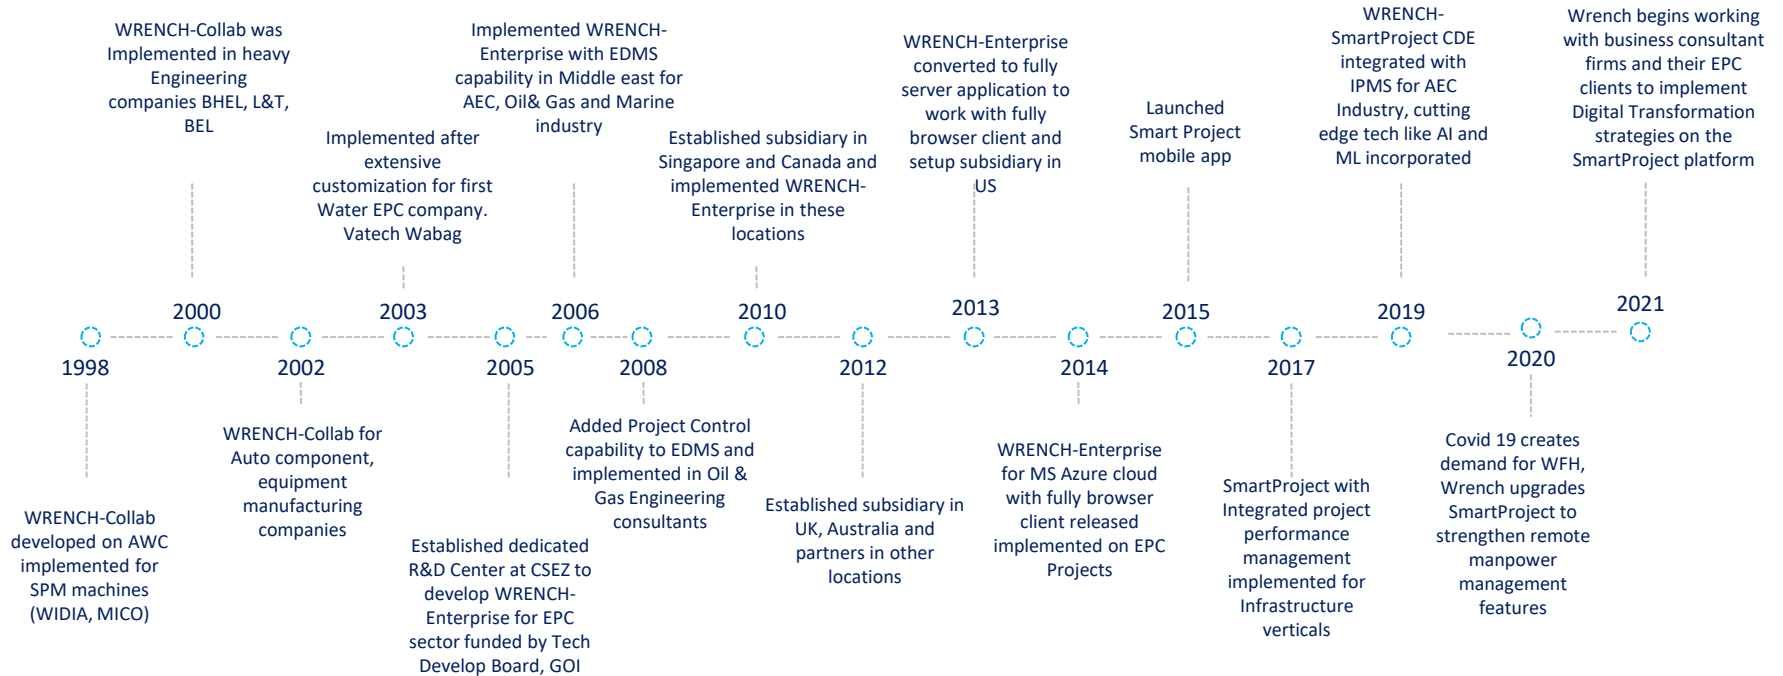

Our vision:

**To be the trusted technology partner
for engineering and construction
industries.**

Our mission:

To consistently deliver a cutting-edge technology platform with global best practices and world-class services to all Wrench customers regardless of company size, configuration, type, or location.

The disruptive digital path: evolution of SmartProject .

Transforming Business with technology

- ✦ We help customers navigate cultural and process bottlenecks to embrace the 'new normal' of a post-pandemic world and turn their challenges into advantages.
- ✦ We use best practices to change the way construction organizations operate, by setting up working environments that are familiar enough to be comfortable yet pioneering enough to boost profits.
- ✦ We incorporate latest 21st century tech like mobile devices, cloud platforms, machine learning, drone tech, and AI to deliver future-proof solutions for data sharing, project management, project control, and collaboration.
- ✦ We help our customers grow their business in unfamiliar landscapes by enabling trust across partners and stakeholders, via a secure shared working environment that enables transparency without affecting privacy.

SmartProject

Our range of project management solutions is delivered to customers on the Wrench SmartProject' platform which runs in the Microsoft Azure cloud environment.

Wrench does not believe in "One Size Fits All". Our clients are assured of maximum quality and cost effectiveness through software that is tailor-made to their vertical and their organisational structure.

**All Wrench solutions and services are scalable, to cater to a variety of budgets and payment models, and can be rolled out in the cloud or on-premises.*

Strategy

To help EPC companies transform their business

(Via a state-of-the-art digital technology platform)

Future-proof your business

Our technology addresses the latest industry trends to help you cut costs and minimise risk while maximising productivity

Seamless solutions

Our technology provides maximum efficiency and minimum rework, which ensures that projects are delivered on time

Best practices built in

An easy and foolproof way to bring about standardisation in your processes and ensure quality in your deliverables

What we deliver:

- A secure, integrated, and responsive software platform for EPC organisations
- Consulting and implementation services that reengineer the customer's business process
- Industry-specific solutions and services across the EPC cycle
- Cloud-based support, training, and implementation

Solutions

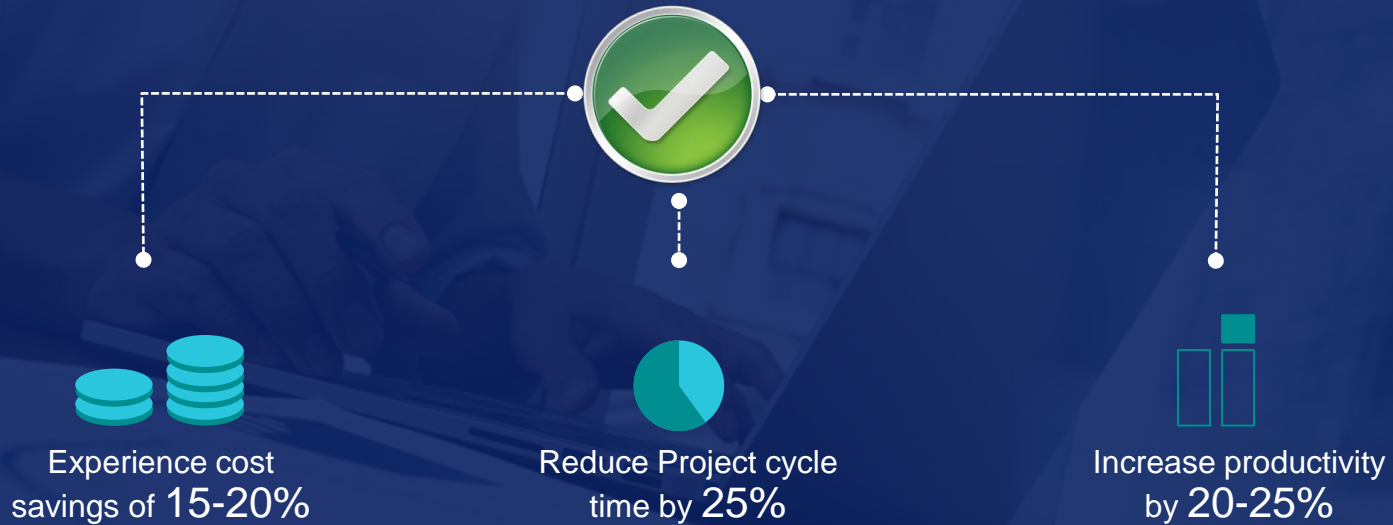

- Project and organization performance monitoring.
- 4D/5D Project status simulation
- Real time monitoring and control of Schedule and Cost.
- Engineering data and document management.
- Multi-office collaboration and correspondence.
- Compliance and governance (Quality & Risk management).
- 360° team and resource management.
- Integrated E, P, and C management (SaaS)

- EDMS
- EDMS + PM
- IPMS

Services

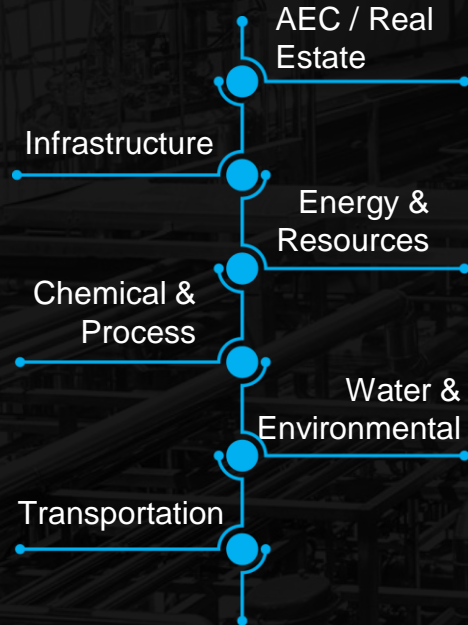

- Best practices implementation
- Data migration and normalization
- Rollout, Training, Support
- Wrench Academy

Our clients benefit from our
intuitive and automated solutions.

Footprint

Industries served

Geographies served

Implemented on over 10000 projects across 29 countries worldwide

- The EPC industry is governed by processes. We've been serving the industry for 23 years and have created a custom-made solution for our clients in addition to software.
- Our solution caters to different industry verticals that helps run critical projects on time and within budget.

10,000 projects worldwide

Notable wins (as of January 2022)

Afcons leveraged Wrench SmartProject to digitally transform its project information system on an upcoming \$530mn project in the Maldives.

Green Li-Ion implemented Wrench SmartProject for its engineering document management system.
